## U. S. Sugar Industry Stores Its Products While We Buy Afar

CLEWISTON—The 1954 quota of sugar which may be marketed in the U. S. was recently increased by 50,000 tons by the Department of Agriculture. But all of the increase was granted to foreign producers.

Meanwhile, United States Sugar Corporation of Clewiston and other sugar producers in the U. S. are storing their production because they cannot obtain an increase in their marketing quota.

The quota increase is due to an increase in consumption of sugar in this country, which has multiplied each year since the Sugar Act was passed in 1948. This act established quotas for domestic sugar producers as well as marketing limits. The act, however, provides that any increase in consumption be given to foreign producers to protect the sugar industries of those countries.

So, while a part of last year's Everglades sugar crops is still stored in warehouses because it cannot be sold, and all sugar produced until January 1st will continue to be held—50,000 more tons than last year—will be shipped into this country from foreign producers.

Present harvest operations of United States Sugar Corporation began on Nov. 1st and would normally extend into May. However, the season will be shortened this year by the quota restrictions now in force.

## Going—Going— But Not Gone!

Saturday they got set to auction off "Sis" Brown's house for non-payment of taxes. Buck Stone was the auctioneer. Everybody who came to the auction knew that "Sis" is a war widow.

When Buck began the bidding he said, "Anybody can bid. Just remember 'Sis' and three nice kids live here. Now who's going to start the bidding?"

There was silence. "Sis," standing in back, got the point. She reached into her purse for just about all the money she had in the world. "I'll bid \$75," she said.

"Sold," bellowed Buck and "Sis" had her home back.

From where I sit, Buck Stone used a helping hand instead of a gavel. It was real neighborliness. You know, even in something as small as respecting another's choice of beverage, a person can be neighborly. You might like buttermilk. I'm "sold" on a temperate glass of beer. And I can't "buy" anyone's telling me I'm wrong.

*Uncle Sam made the bonds you own  
an even better bargain!*

# Now your maturing Series E Bonds can earn interest 10 more years at 3%

PRESENT TREASURY REGULATIONS make it possible for you to collect a return of as much as 80% on the Series E Savings Bonds you already own!

For now those Bonds which you invested in 10 years ago can go right on earning interest for ten more years without your doing a thing about it! That is true not only of the Bonds which you have held for ten years, but any other Series E Bonds which you have invested in in the meantime. And any Series E Bonds which you obtain now will also enjoy the extended earning period. They will start earning interest sooner and mature earlier, too, paying 3%, compounded semiannually.

The Bond you got for \$18.75 can now pay you \$33.67 . . . a \$37.50 Bond will be worth \$67.34 . . . and so on.

Of course, any Series E Bond may still be redeemed at any time after you have held it for two months. But, like any other form of saving, your Bonds will mean a great deal

more to you if you can hold on to them.

Are you one of the millions of Americans who are saving regularly with Savings Bonds through the Payroll Savings Plan? If you're not, why not start now? Invest regularly in Bonds through the Payroll Savings Plan where you work. Ask your pay office to save as little as 25c a week for you, or as much as you are able.

If you can save just \$5 a week regularly through the Plan, in five years you will have \$1,367.90 . . . in 9 years and 8 months, you'll have \$2,850.70 . . . and in 19 years and 8 months, \$6,872.45! This Plan is one sure way to save because it saves something out of every check before you have a chance to spend it.

So join the Payroll Savings Plan where you work today. Or, if you are self-employed, start the Bond-A-Month Plan where you bank. It's safe, it's sure, it's automatic. And you will be helping yourself and your country!

If you want to be paid  
your interest as current income—  
invest in 3% Series H

If you want a good, sound investment which pays you your interest by check every six months, ask at your bank about United States Government Series H Bonds. Series H is a new current income Bond available in denominations of \$500 to \$10,000. Redeemable at par after 6 months and on 30 days' notice. Matures in 9 years and 8 months and pays an average 3% interest per annum if held to maturity. Interest paid semiannually by Treasury check. Series H may be purchased at any bank, annual limit \$20,000.

And your job can be not only easy but rewarding—in financial security for you and your family. Just buy U.S. Defense Bonds. Buy them now and buy them regularly. For your bonds and other forms of saving can make America strong. And in this warring world, *strength is America's surest guarantee of peace.*

So sign up for bonds today—through the Payroll Savings Plan where you work or the Bond-A-Month Plan where you bank. For your security and your country's, too, buy United States Defense Bonds regularly!

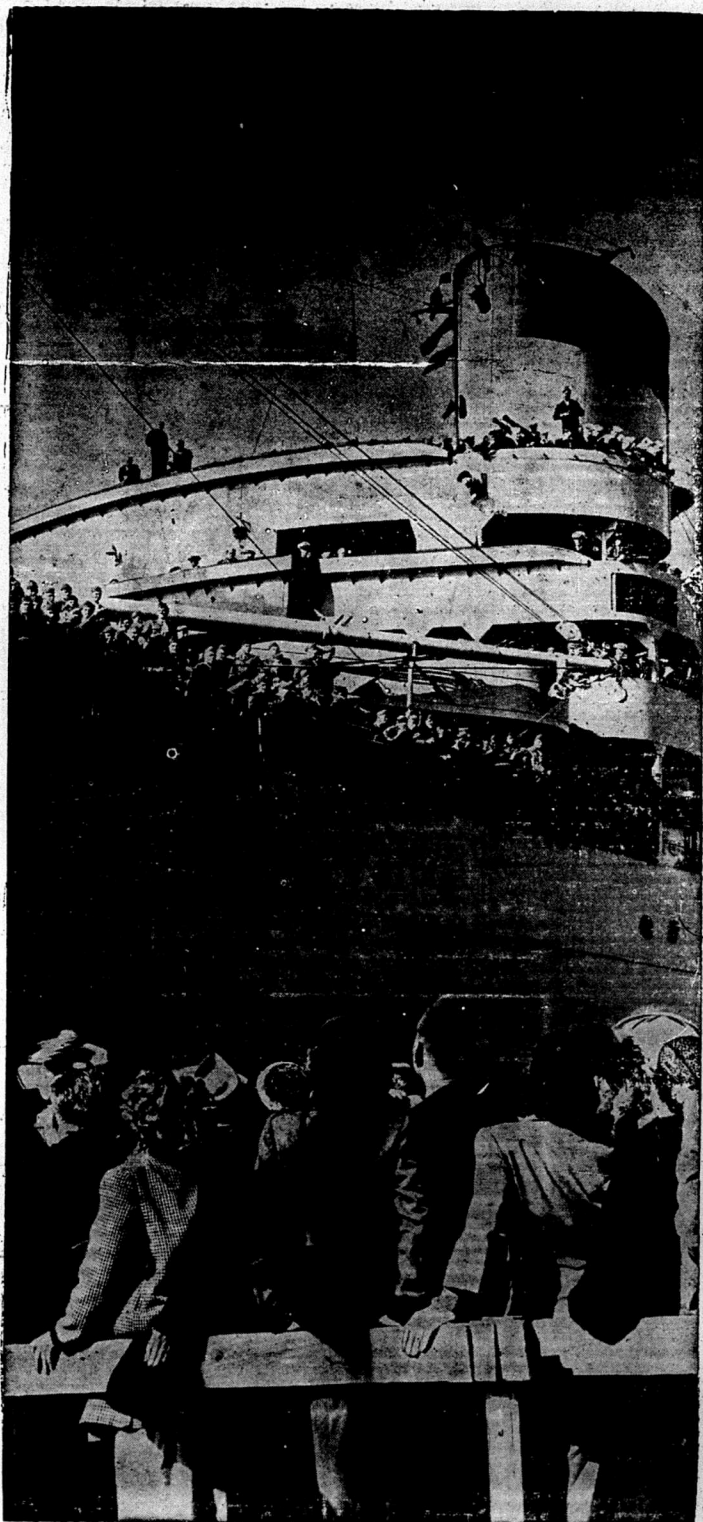

### The U. S. Defense Bonds you buy give you personal financial independence

Don't forget that bonds are now a better buy than ever. Because now every Series E Bond you own can automatically go on earning interest every year for 20 years from date of purchase instead of 10 as before! This means that the bond you bought for \$18.75 can return you not just \$25—but as much as \$33.33! A \$37.50 bond pays \$66.66. And so on. For your security, and your country's too, buy U. S. Defense Bonds now! Bankers recommend them as one of the safest forms of investment.

## WHICH ONE DO YOU WANT?

*you can have your dream house—this easy way!*

A dream? Not at all. Thousands of people with modest incomes have been able to save the down payment, or the whole price, of the home of their dreams—because they invested in U. S. Savings Bonds on the Payroll Savings Plan. Look at the chart on this page. See how you can accumulate enough money for the down payment on a home. Or enough for your children's college education or a retirement income. And by saving only a few dollars a week, too.

The answer is that you save systematically on the Payroll Savings Plan. All you have to do is tell your pay office how much you've decided to save each payday (it can be as little as a couple of dollars). After that your money is saved for you, before you get your salary. Then each time enough has accumulated, it is invested in a Bond, and the Bond turned over to you.

And remember—your U. S. Savings Bonds now will bring you an average of 3% interest, compounded semiannually, for 19 years and 8 months. That's why the money you put into Bonds now grows to such a surprisingly big sum.

Why don't you start—today? Sign, where you work, for the Payroll Savings Plan. Or, if you're self-employed, have your banker enroll you in the Bond-A-Month Plan. It's as easy as the Payroll Savings Plan.

### How you can reach your savings goal on the systematic Payroll Savings Plan

	If you want approximately		
	\$5,000	\$10,000	\$25,000
Each week for 9 years and 8 months, save...	\$8.80	\$18.75	\$45.00
Each week for 19 years and 8 months, save...	\$3.75	\$7.50	\$18.75

This chart shows only a few typical examples of savings goals and how to reach them through Payroll Savings. You can save any sum you wish, from a couple of dollars a payday up to as much as you want. The important thing is, start your Plan today!

## Sugar Cane Yield Higher Than Ever

Florida's sugar cane crop was worth \$13,023,000 to growers and farmers last year. Sugar cane raised in the state for the production of sugar totaled 1,450,000 tons in 1953. This cane, plus about 35,000 tons saved for seed, had a grower value of \$12,657,000. In addition, farmers throughout Florida harvested six processed and sold as syrup, worth \$966,000, the Florida State Chamber of Commerce stated.

Florida's suitability for cane production is analyzed in this week's business review of the State Chamber's research and industrial division. The per acre yield in Florida is a little under 35 tons today, compared with a 1941-1950 average of 30 tons. Florida's high yield, due mainly to a longer growing season, is well above the 20.3 tons per acre produced in Louisiana, the only other large cane producing state.

Total Florida production of raw sugar was 149,000 tons last year, about 8 per cent of which was refined within the state. Blackstrap molasses, a valuable livestock feed by-product of sugar production, reached about 7,975,000 gallons last year, worth \$1,271,000, including cane

costs. Bagasse, the spent fibre of cane, can be used for fuel, livestock feed, fertilizer, as well as wall board and paper. Florida production of bagasse last year was about 134,000 tons, dry weight.

George Gant spent the Thanksgiving Holiday with his mother, Mrs. Albert Gant in Pahokee. While here he attended the Pahokee-Belle Glade football game Wednesday night and returned to Miami Sunday where he is enrolled in college.

### ADULT CLASS ELECTS OFFICER
